Store Packaging Reclaim explained

Gold Package

Free Scheduled Collection + Baler + Rebates

Our **Gold Package** is ideal for those companies that seek to better organise their warehouse through the installation of a baler and still benefit from free collection service and earn money.

We will collect **free-of-charge** any baled cardboard and plastic packaging and **give rebates** on quantity collected. Suited for companies that generate 2.5 tonnes or more of packaging a month.

Silver Package

Free Scheduled Collection + Rebates

The **Silver Package** has been designed for companies that already bale their warehouse packaging. This package offers a scheduled **free collection service** to seamlessly integrate with your warehousing activities. **Full rebates given** on baled packaging collected.

Bronze Package

On-Demand Collection Service + Rebates

The **Bronze Package** is suitable for those companies that generate small quantities of warehouse packaging waste. **Rebates given** on the warehouse packaging generated and if you deliver the material yourself to our facility you will even save the small fee we would charge when we collect the material ourselves.

Payment on Cardboard and Plastic waste

Whether you subscribe to the **Gold, Silver** or **Bronze Package**, you will always benefit from a rebate. A rebate of **€40 per metric tonne** (1,000kg) will be paid on baled material and a rebate of **€35 per metric tonne** (1,000kg) will be paid on loose material. The amount due to you is updated on your on-line secure account which you can be accessed via <https://greenpak.com.mt/login>. Payments are made every quarter.

Collection Service

The *Store Packaging Reclaim* scheme provides for the collection of sorted and clean warehouse packaging materials, namely Old Corrugated Cardboard (OCC) and plastics. Regular collection services are provided on weekly, fortnightly, monthly or on-call basis, allowing 3 working days prior notice from start of service. To qualify for free collection service, a minimum quantity of 8 bales has to be collected. A maximum charge of €30+VAT per collection may apply for collection of loose material or on smaller quantities.

Materials Collected

The *Store Packaging Reclaim* scheme covers OCC and clean plastics. However, warehouse packaging waste may include other waste streams. By prior arrangement, we do organise collection of clean and empty metal drums, cans, tins, glass containers and wooden pallets. Contact us for details.

Provision of Baler

For those who do not already own their own baler, together with U-Recycle, GreenPak offers an easy rental scheme with no capital outlay. Choose the most appropriate baler for your warehouse operations and pay it back from the rebate you earn. Full details are available on request.

Recommended use per week	Model	Bale size	Rebates from
Up to 2,000 kg	CK RR151	150 - 200 kg	200 t
Up to 5,000 kg	CK RR500V	400 - 500 kg	350 t
Over 5,000 kg	Compactor	25 m ³	475 t

Colour coded Bins

Under the *Store Packaging Reclaim* scheme we are encouraging companies to improve their warehouse waste management by installing space-saving balers. Nevertheless, on request we can still provide colour-coded 1100 litre wheelie bins. Charges may apply. Contact us for details.

Contaminated material

All materials that are collected and/or delivered must be clean, separated and free from any contaminants. Extra charges may apply for contaminated materials and unsorted material.

Conditions may be subject to change. Prices do not include VAT
